

Nimbus Mobile

Nimbus mobile is a test logger for fire alarm service engineers and technicians. It communicates and records fire alarm commissioning and service activities to Nimbus.

Nimbus Mobile is supplied in a portable carry case which includes a USB battery, auxiliary power cables and a USB power plug .

Paperless records

- ✓ Creates central log of service activity by device, engineer and date
- ✓ Reduces administration duties and costs
- ✓ Independent proof-of-testing audit trail
- ✓ Streamlines external auditing

Performance data

- ✓ Facilitates monitoring and analysing site and engineer performance

Plan and schedule

- ✓ Define how many services visits are required per annum and which fire alarm devices are to be tested each visit

Benefit of using Nimbus Mobile with Nimbus Engineer

- ✓ Service period test scheduling of fire alarm devices
- ✓ Test results recording and logging with comments and photos
- ✓ Live test confirmation and device verification
- ✓ Increased engineer efficiency
- ✓ Reduced administration costs
- ✓ Better staff utilisation for single engineer testing
- ✓ Transparency and validation of performed work
- ✓ Optimised rectifications
